

Elementary Anatomy and Surgery for Nurses; A Series of Lectures Delivered to the Nursing Staff of the West London Hospital

Filesize: 2.33 MB

Reviews

A whole new eBook with a brand new point of view. It is definitely simplistic but shocks in the 50 percent of the publication. I am just pleased to explain how this is the greatest ebook i have read during my very own daily life and could be he best ebook for possibly.

Rarebooksclub.com, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1896 Excerpt: .Mouth and Pharynx.--Troublesome bleeding may sometimes occur from the socket from which a tooth has been extracted. It can usually be readily stopped by rinsing the mouth out with ice-cold water, but in certain cases it requires that the cavity be plugged with some cotton wool which has been steeped in a solution of the perchloride of iron. After operations on the tongue haemorrhage may supervene, and, if excessive, a nurse should remember that she can always temporarily arrest it by hooking a couple of fingers round the base or stump of the tongue and drawing it forward against the lower jaw. In this manner the lingual artery is firmly compressed. Sometimes there is a good deal of oozing after excision of the tonsils, or removal of growths from the naso-pharynx. Gargling with icecold water is efficacious if the bleeding is troublesome. It is well to know that the blood in these cases is frequently swallowed, and may afterwards be vomited. Haemorrhage from the Nose (Epistaxis).--This may sometimes be so large in amount as to be serious. The chief causes of epistaxis are: (1) congestion of the mucous membrane, by no means infrequent in children about fourteen years of age; (2) injury to the nose; (3) polypus of the nose; (4) in plethoric persons; (5) in the old with diseased vessels, (6) in some of the specific fevers, and in bleeders. The haemorrhage generally occurs from org nostril, and the blood not infrequently trickles down the...
