It has been heretofore, impracticable to use them in a number of situations because of their bulk and absence of portability. Owing to their construction the recording pens are in constant contact with the sheet making a continuous record, thus the instruments cannot be moved without making the record illegible. In the hythergraph the pen is on the sheet less than a minutes time; this makes it possible to use it in airplanes, balloons and on all kinds of aircraft generally. Besides being small (4x8xl Inches) and light (weight 3 pounds) it is flat and indicates the temperature on one side and the humidity on the other. A dual record is made possible by the use of a continuous band of recording paper feeding over two rollers placed at such a distance from each other that the records can be readily seen. accomplished by means of transparent windows on either side of the case (see plates 1 and 3). The instrument is both indicating and recording: the former is accomplished by means of graduated scales on the cover. Radium figures are also provided so that the temperature and humidity readings may be available in the dark as well as in the light. Such an arrangement is not only a great convenience to industrial users of the hythergraph. as, for example, by fumigators whose work requires them to do much of their work at night, but to airmen during their voyages. A gear-shift has been...
