

Topologische Fragestellungen bei der Kombination von 3D-Stadtmodellen mit 2D-Karten in einer Räumlichen Datenbank

By Edgar Butwilowski

GRIN Verlag Okt 2009, 2009. Taschenbuch. Book Condition: Neu. 296x209x15 mm. This item is printed on demand - Print on Demand Neuware - Diplomarbeit aus dem Jahr 2007 im Fachbereich Geowissenschaften / Geographie - Kartographie, Geodäsie, Geoinformationswissenschaften, Note: 1,5, Universität Osnabrück (Institut für Geoinformatik und Fernerkundung), Sprache: Deutsch, Abstract: The main theme of the diploma thesis at hand lies in the scope of modelling three-dimensional geodata. As three-dimensional data increasingly penetrate the world of geomatics, the question arises, how these can be modelled and governed in the surrounding field of Geographic Information Systems. Some answers to this question are given by the bundle project 'Abstraktion von Geoinformation' promoted by the 'Deutsche Forschungsgemeinschaft' (German Research Foundation), which supplies the background of this diploma thesis. A special topic in the bundle project is the modelling of topology, which is also examined in the subproject Modellierung und Analyse der Topologie in Multiple Representation Databases at the University of Osnabrück. A possible general approach to the modelling of topology is given by the Cellular Complexes. These play a vital role in the course of the diploma thesis and are implemented by so-called Generalized Maps. The work presents an inventory of existing approaches for the...
